Dear Mr. Montgomery:

Per our telephone conversation this afternoon, SABIA has operated several materials analyzers under research and development per license condition 9E of license No. 11-27727-01. In November, 2004, device registration No. NR-1195-D-103-S was issued. Following that date, SABIA, Inc. has notified all customers that the operations of the SABIA Model XC-series-25 and SABIA Model XC-series-50 requires transfer to a customer specific license. The customers have received site specific licenses for possession and operation of these devices. Following receipt of customer license, SABIA has transferred possession of the device and radioactive materials from SABIA to the specific license issued to the customer. This transfer has included all documentation of shipping, receiving, inventory and leak testing for these sources. Following acknowledgment of this transfer, SABIA has requested for the NRC to amend the License No. 11-27727-01 to remove the specific users authorized at these sites. SABIA continues to operate several analyzers under provisions of research and development, for new design products, pending issuance of a sealed source and device registration. Thank you for your prompt attention to this matter.

Sincerely,

\RA\

James F. Miller, R.S.O.
