

RES Confirmatory Fire Performance Testing of Hemyc and MT ERFBS
Publically Available RES Documents

Using either Citrix or Web-based searches, publically-available Hemyc and MT fire-test-related documents can be obtained from the NRC's ADAMS system at the following accession numbers:

Pre-test photographs, and guides to those photographs, for Hemyc Test #1 (conduits) and Hemyc Test #2 (trays) at ML051080396.

Thermocouple (TC) maps and TC data for Hemyc Test #1 at ML050960202;

TC maps and TC data for Hemyc Test #2 at ML050960226;

A summary of the results of Hemyc Test #1 and Hemyc Test #2 at ML050880176;

The final version (Revision M, 4/08/05) of the Hemyc and MT test plan at ML051040193;

Post-test photographs by Omega Point Laboratories, Inc., (OPL, the testing lab) for both Hemyc tests, and all photographs presented at the 4/29/2005 public meeting, at ML051230289;

The final OPL reports for both Hemyc tests, at ML051190026 (package of 21 documents); and

The final OPL report for the MT test at ML051430406 (package of 12 documents).

{Although they are not RES documents, it's noted here for convenience that the NRR-issued Information Notice 2005-07 regarding Hemyc test results is located at ML050890089, and the NRR-issued Meeting Notice for the 4/29/2005 Public Meeting is located at ML050960585.}
