Person(s) Calling: Jim Dwyer			
Subject: Request for expedited amendment of the Unigene license			
<p>Summary:</p> <p>Dr. Levy called to request we expedite a request submitted by Unigene two weeks ago to add an authorized user and a location of use. Dr. Levy said the amendment was needed to respond to an FDA request for information. While the amendment request describes use of many materials at the new site, Dr. Levy said that only iodine-125 in the form of RIA kits would be used at the new facility at this time. I told Dr. Levy that, in the interest of time, I would limit use at the new facility to iodine-125 in the form of RIA kits and Unigene could expand this authorization as needed in the future.</p>			
Action Required/Taken: issued amended license
