Subject: Conference Call the NRC

Tommy

Thank you for the follow-up information provided during our conference
call earlier today. I wanted to send you this message just to be sure
we captured the significant parts of the conversation. The following
items are the ones we noted:

*   Your Reviewers wanted to know if we would be submitting drawings
relevant to the NSR (a)(2) re-scoping effort. Our response was that
although we had not originally intended to provide such drawings with
the amended Application, we will be able to send hand-marked drawings
for the systems added or system were we excluded some equipment during
the re-scoping effort with the LRA on July 15th. Other systems within
the (a)(2) category will be hand-marked and sent as soon as practicable.
*   The text in the LRA will be expanded with respect to level of
detail for the (a)(2) re-scoping effort as requested during the June 9th
meeting and reiterated during today's phone call.
*   Since the exchange of letters between NMP and NRC in early
March, the Staff has not generated any formal requests for additional
information (RAIs); however, you requested that we confirm that we had
received certain items and will respond to them. We confirmed the items
mentioned had been received and responses have either been developed or
are in the process; these included: RAI 4.7.2 (MSIV corrosion
allowance), RAI B2.1.11-2 (U2 Control Building Chilled Water (HVK)
System, and RAI 3.1.2.C.4-1 (Material specifications for NSR piping,
etc.). You also mentioned the Staff had a comment that had not been
forwarded to us that asked about our commitment to implement
enhancements associated with the Closed-Cycle Cooling Water Program
(XI.M21); we expect to address this commitment in the appropriate LRA
section.
*   You requested the e-mails that contained reference to the RAIs
to assure the ADAMS Accession numbers were present and correct. I sent
these to you earlier today.
*   You noted that an Electrical Reviewer may have some questions
regarding previous responses; however, at this time the Staff will wait
for the amended LRA to see if those questions are answered
satisfactorily therein.
*   We requested that you let us know the number of LRA "hard
copies" and "CDs" you need for your review at your earliest convenience.

Again, thanks for taking the time to clarify these issues; if there are
any discrepancies in the above summary, please let me know.
