Reference: Radioactive Materials License No. 45-25424-01

Dear Mr. Perkins:

We would like to request that our radioactive materials license be amended add Gadolinium-153 with a possession limit of 1 Curie. The manufacturer of these sealed sources is Isotope Products Laboratories, and the model number is NES-8497. These sources will be used for attenuation correction in our new gamma camera.

Any assistance in expediting this request would be greatly appreciated. Please contact Roy F. Heltzel, Jr., our consulting physicist, at 757-410-9051, should further information be required.
