

June 23, 2005

NOTE TO: NRC Stakeholders

FROM: Richard Lobel **/RA/**  
Senior Reactor Systems Engineer  
Office of Nuclear Reactor Regulation  
Nuclear Regulatory Commission

SUBJECT: PUBLIC AVAILABILITY OF PROPOSED REVISIONS TO REGULATORY  
GUIDE 1.82 REVISION 3, REGULATORY GUIDE 1.1 AND STANDARD  
REVIEW PLAN SECTION 6.2.2 REVISION 4

Proposed revisions to the following documents are being made available to all Nuclear Regulatory Commission (NRC) stakeholders in advance of a meeting between the NRC staff and the Advisory Committee on Reactor Safeguards (ACRS) to discuss the proposed changes.

Ordinarily, these documents would not be made publically available until after receiving review by ACRS and the NRC Committee to Review Generic Requirements (CRGR). However, in order to facilitate discussion at the July 21, 2005, meeting between members of the staff and the ACRS Subcommittee on Thermal Hydraulic Phenomena, these documents are being made available now. This is not the beginning of the public comment period. The public will have an opportunity later for comment on these documents and in compliance with the usual procedures, the staff will consider these comments before final versions of these documents are issued. The following documents are being made available.

1. Regulatory Guide 1.82 Revision 3, "Water Sources for Long-Term Recirculation Cooling Following a Loss-of-Coolant Accident," November 2003
2. Regulatory Guide 1.1, "Net Positive Suction Head for Emergency Core Cooling and Containment Heat Removal System Pumps," November 1970
3. Standard Review Plan Section 6.2.2, Revision 4, "Containment Heat Removal Systems," October 1985

Attachments: As stated
