~~called site~~ talked  
to ~~David~~ Skrincosky. He  
said he realized he hadn't  
gotten back. He received my  
e-mail. He  
apologized  
said he'd  
work on

It is true that you have provided some information for Items 5-11, however, more detail is needed as indicated in response from applicant at the end of each Item. More specifically, page 8-24 indicates several acceptable means of providing information on survey meters and their appropriate calibration. Page 8-30 provides acceptable responses to address material accountability. You have not addressed Emergency Procedures in the event of a spill or other unforeseen event. Page 8-46 provides acceptable responses for addressing surveys. With regard to wastes page 8-54 refers to Appendix T of the guide which contains greater detail than you have provided. Hopefully this will help you to better understand what additional information is needed. I am currently not in the office but may be reached by cell phone at 484 868-0993.

Thank you again.

Dear Mr. Thompson,

I am writing in regard to information you requested concerning our Material License renewal (License No. 29-11577-01; Control No. 136336). Your e-mail on 2/10/05 stated that we should "provide the information requested under response from applicant at the end of each section". We completed and submitted the APPLICATION FOR MATERIAL LICENSE, NRC form 313 and responded to Items 5 through 11 on separate sheets of paper attached to the application as instructed. I am not sure if you are missing these documents or if you require entirely different information. I would be grateful if you could clarify your request so we could send the information you require as soon as possible. Thank you for your time and consideration.

Sincerely,

David Skrincosky
