

NMMSS Technical Progress Report November 2004

Under Contract Number DE-AC03-98SF21544, Tasks 1, 2, & 3

This report summarizes the NMMSS program's technical progress for the month of November 2004. The report was submitted to DOE SO-20.3 and a copy was provided to the NRC as its Monthly Status Report.

A. Project Management

1. NMMSS processed the September reporting period data and closed the fiscal year on November 12th (about one week earlier than in any of the prior six year). The end of year reports were also disseminated.
2. NMMSS closed the October reporting period and disseminated the reports on November 23rd. This closing was more than a month earlier than the average of the last six years.
3. Per the NMMSS one-time reconciliation of DOE-owned materials at licensee facilities, NMMSS has reconciled 139 of the 153 non-DOE facilities with DOE-owned material as of 30 November.
4. The overall error rate (1.40%) on transaction data for November decreased from October (1.64%). The DOE rate for the month was 0.31%, slightly lower than last month's rate of 0.71%. The NRC facilities' error rate was 2.07% in November, which was lower than the error rate in October (2.24%). Refer to paragraph f. (1), of page 4, below.
5. NMMSS received Classified Matter Protection and Control (CMPC) training by a DOE-SR CMPC instructor November 10.
6. Members of the NMMSS staff witnessed the System and Factory Acceptance testing at SRS.

G. Barriers and Issues

The scheduled December completion of the reconciliation of DOE-owned material at NRC licensed facilities is pending the following DOE, NRC or Licensee actions:

- 8 Deactivated facilities with material balances for which NMMSS is awaiting guidance from DOE and NRC
- 5 Active facilities with balances that owe information to NMMSS
- ZBI and ZIB intend to provide balances of DOE-owned natural uranium but have no formal date commitment
- Three frequent submitters reconciled as part of normal operations currently resolving discrepancies or that have pending submittals (YBC, ZMZ and ZXC).

H. Resource Allocation

During the month, the following NAC staff supported NMMSS: Christa Gray, Gary Leamon and Fritz Strydom supported DOE requirements, and Mike Smith responded

to foreign obligation questions from licensees. These individuals are not expected to be necessary to support the NMMSS project during December. The costs for these activities are within the existing plan. These additional resources will allow NMMSS staff to stay focused on priority, on-going NMMSS activities.

The projected schedule for closures through December is as follows:

<u>Monthly Data</u>	<u>Date Range</u>
September 2004	Closed November 12, 2004
October 2004	Closed November 23, 2004
November 2004	December 22, 2004
December 2004	January 25 – February 01, 2005

The schedule above is based on regular NMMSS operations and DOE Headquarters direction to close NMMSS books by the 5th working day following the 15th of following month for all months, excluding months affected by DOE semi-annual reconciliation. The December 2004 closure date is primarily dependent on the receipt of the transactions from USEC related to foreign obligated tails production for the quarter ending December 31, 2004. The transactions are needed for end of year reports, which contribute to reports provided to countries with which the United States government has bilateral agreements. USEC has previously been given five weeks from the end of the quarter to submit these transactions. NMMSS is working with USEC to determine the feasibility of an earlier delivery.

The projected schedule for review and revision of plans and procedures is as follows:

<u>Plan/Procedure</u>	<u>Completion Date</u>
135-PR-665, Data Input, Processing and Closeout	December
135-PL-220, Information systems Security Plan	December
135-PL-300, Software Configuration Plan	December
135-PL-410, Project Quality Assurance Plan	December
135-PR-305, Software Change Request Procedure	December

I. Security and Quality Assurance

1. Security

- a. There were no identified security infractions during the month.
- b. There were 25 visitors to the NMMSS area during the month. Nine had "Q" access authorizations, two (2) had "L" access authorizations, and the remainder had none. Visitors without a "Q" access authorization were escorted. A NMMSS and Consulting staff meeting resulted in elevated visitor numbers.

- c. All assigned NMMSS personnel have DOE/SR issued “Q” access authorizations. Interim "Q" authorization per DOE-SR: Two (2).
- d. The following NAC staff has submitted security clearance requests to DOE: Pete Walier, Mike Smith, Fritz Strydom, and Ernie Dake.
- e. The NMMSS senior security officer resigned in late November, and his duties were assumed by Tony Escobedo.

2. Quality Assurance

NAC QA reviewed and provided comments and approvals for five revised plans and procedures and participated in the CCB meetings.

E. Plans and Procedures Revisions

The following plans and procedures were issued during the month:

- 135-PR-645, NMMSS Data Request Procedure
- 135-PL-001, NMMSS Project Plan

F. Data Processing

(1) Transactions Processing

During the month of November there were 20 workdays for processing during which a total of 21 daily processing runs were made. A total of 3,966 741 equivalents were processed containing a total of 14,606 transaction records. Of the 14,606 transaction records processed during the month, there were 205 identified errors, for an overall error rate of 1.40% (205/14,606). This represents a decrease from the overall October error rate (1.64%). The following table depicts the overall performance of DOE contractor and NRC licensee facilities.

	<u>Records</u>		<u>Error Rates</u>
DOE Facilities	5,542	17	0.31%
Licensee Facilities	<u>9,064</u>	<u>188</u>	<u>2.07%</u>
Total	14,606	205	1.40%

The error rate for the DOE facilities has decreased since the previous reporting period (0.71%), and remains well below the 2% metric. The NRC facilities error rate has also decreased since the previous reporting period (2.24%).

The DOE has established a goal of holding the error rate at a level less than 2%. The following data summarizes the degree to which the metric was met. The number of facilities that had a zero error rate is also listed below. Efforts continue toward the goal of achieving 100% of facilities with error rates below the metric of 2%.

¹ Includes both contractors and DOE-owned and operated facilities.

² Includes both NRC and Agreement State Licensees.

	Number	% of Total
Facilities Reporting	45	100%
Error Rate Below 2%	42	93%
Error Rate of Zero	38	84%

Of the 45 DOE facilities that submitted transaction data, those that did not meet the metric are listed below.

Facility	Records	Errors	Error Rate
CBJ, USDOE, New Brunswick Lab, Illinois	24		8.33%
HYA, Battelle Memorial Institute, Pacific Northwest Lab	117		5.88%
JXI, Bechtel BWXT Idaho, LLC	94		4.25%

The error rates listed above were attributed to the low volume of records compared to the number of records in error.

See the table below for the performance of the major facilities during the month of November. The ten top facilities in terms of volume of transaction records for DOE and NRC facilities are considered major for the purposes of the table.

Facility	Records	Error Rate
BYC, USEC, Paducah GDP	1,581	0.06%
AUA, Los Alamos National Laboratory	1,388	0.00%
YLM, Westinghouse Commercial Fuel Division	1,380	0.07%
LZB, U Cal, Lawrence Livermore Laboratory	901	0.00%
YSP, Honeywell International Inc.	764	3.14%
YLJ, Global Nuclear Fuel – Americas	749	1.86%
YUD, Framatome ANP Inc.	713	1.12%
FZE, Bechtel Jacobs Company LLC	667	0.29%
ZIB, Duratek, Inc.	615	2.92%
VDM, Envirocare of Utah, Inc.	455	0.00%

USEC-Paducah GDP, the Los Alamos National Laboratory, and Westinghouse Commercial Fuel Division lead major facilities in the number of transaction records reported with very low error rates.

(2) Inventory Reporting

During the month of November, a total of 159,347 inventory records were processed.

a. Licensee Reconciliation Status Based on Annual Reporting Requirement for CY-2004³

Number Reported	Number Reconciled	Number Reported Not Reconciled
158	134	24

(4) International Reporting

Reporting to the IAEA:

Report	RIS	Coverage Period	Date Dispatched
ICR-288, ICR-207, and CN-207	YLJ, YLM, YNJ, YUD	10/01-31/2004	11/30/2004
ICR-288	ZOO	10/01-31/2004	11/29/2004
PIL-288, MBR-288, and ICR-288	DZC	11/10/2003-11/15/2004	11/22/2004

(5) Standard Report Distribution

A total of 1,594 reports were distributed in November 2004. Distribution was as follows:

Print	225
Diskette	123
Remote Link	726
Email	7
SIMEX	<u>513</u>
Total	1,594

(6) User Customer Service Issues

³ The following licensees (RISs) have not reconciled for one or more previous reporting periods: GTS Duratek (ZBI, ZIB, ZIV), University of Illinois (ZJR) (one period not reconciled), and University of Michigan-Michigan Memorial Phoenix Project (ZMZ).

REPORT RELATED	DATE	USER	RIS	ISSUE	RESOLUTION/DATE
I-018-1	09/20/2004	Giles Bailey	DAA	Report showing differences between time periods.	Still under investigation. One problem has been identified. March and September reports pulled from reported inventory. For all other months, the report is generated using inventories generated from transactions. SCR 50114 input to have report pull generated inventory for all months.
T-141	11/30/2004	Paulette McGill	FZG	T-141 end of year booklets were distributed with a date of 09/30/2004. The date should have been 10/01/2004 to reflect the changes for FY2005.	Resolved: New reports were issued the first week of December.

G. Status of Special Tasks

- (1) NMMSS continued to assist licensees in support of DOE's one-time reconciliation projects. Bi-monthly reports are provided to the sponsors.
- (2) The NMMSS Classic Software Team (NCST) has developed a schedule for deliverables related to the Parallel Test Plan. The milestone dates are contingent on the NMMSS Upgrade Software Development Team (USDT) meeting their milestone dates related to documents the NCST need to include and/or reference in the Parallel Test Plan. Below are documents required to complete the Authority Reference Spiral Increment portion of the Parallel Test Plan.

SRS Deliverables Needed by NAC For Parallel Test Plan			
SRS Deliverable	Document Status	SRS Milestone Date	Delivery Status
NMMSS Upgrade SDD	Complete	10/12/2004	Delivered
NMMSS Upgrade Acceptance Test Plan	Complete	10/12/2004	Delivered
NMMSS Upgrade Acceptance (System) Test Report – Authority Reference		12/14/2004	Waiting
Spiral Increment Software Installation Directions (Authority Reference).		12/14/2004	Waiting
NMMSS Upgrade Software Product/Converted Data or System Files (Phase 1 Authority Reference)		12/14/2004	Waiting

C. <u>NAC Parallel Test Schedule for Authority Reference</u>	
Milestone	Dates
Software Delivery Date (SRS)	12/14/2004
Documentation Completion Date (NAC)	11/24/2004
Software Installation Completion Date (NAC)	12/31/2004
Parallel Testing Start Date (NAC)	12/31/2004
Parallel Testing Completion Date (NAC)	3/31/2005

H. FoxPro NMMSS Maintenance

- (1) During the month, one software configuration control board meetings was held to act on Software Change Requests (SCRs). During the month, SO-20.3 approved two SCRs for moving to the production database and two were approved for programming.
- (2) Enclosure four lists the outstanding SCRs.

I. Planned Activities for December 2004

- (1) NMMSS plans to close the November month in December.
- (2) NMMSS staff will focus on processing data and reconciling licensee facilities with DOE-owned materials.
- (1) NMMSS Classic Software Team (NCST) will continue to participate in upgrade status meets hosted by the NMMSS Upgrade Software Development Team (USDT).
- (2) NMMSS will continue procuring and installing software and hardware to support the new upgrade configuration effort.
- (3) Factory Acceptance testing will occur from November 30 – December 7.
- (4) Both a Counterintelligence and Foreign Visitors & Assignment Briefing are scheduled for December 14, 2004.
- (5) Members of the NMMSS staff will participate in the NMMSS Upgrade Requirements Review 12/15 – 12/17. The review will cover the next module, transactions.

Data Requests Issued in November 2004

Enclosure 1

#	Organization	Name
1	NAC/QFA	Dan Collier
2	DOE/DZA	John Robichaux
3	DOE/FAA	Tom Wynn
4	DOE/DZA	John Robichaux
5	DOE/FAA	Judy Seiber

* Los Alamos National Laboratory (RIS AUA) did not submit July and August inventory until the week of September 27, 2004. The facility was unable to report due to issues with Classified Removable Electronic Media (CREM).

** FXA, FYF, and FZF reported September 2004 inventory on or prior to October 15. However, all of the facilities removed their inventories from NMMSS on November 3. FXA resubmitted September inventory on November 4, 2004. FYF and FZF resubmitted September inventory on November 8, 2004.

Notes:
1)NMMSS is working with XJD to resolve reporting of foreign obligated material.
2)ZQM reported negative inventories and NMMSS is working with the facility to reconcile these discrepancies.

SCRs Outstanding⁴

SCR #	Description	Priority	Schedule	Comments
40354	V station must enter owner code if detail lines are reported, otherwise the record is in error	Important	Complete	On hold per SO-20.3, 9/18/02
40369	When receiving V station submits an A/B transaction with zero detail lines, NMMSS will generate detail lines and will use owner code entered by the shipper	Important	Complete	On hold per SO-20.3, 9/18/02
50035	Create a report that fulfills the requirements in the NMMSS Guidance Document 2002-01	Non-critical	Re-assigned to SLB	
50037	Create a windows based application to download files from the direct links.	Non-critical	In Test	
50055	Add an edit to ensure that receiver's weights are within 10% +/- the shipper's weights	Non-critical	TBD	
50080	Convert SAMS from DOS to Windows	Important	Assigned to SLB	
50108	Add edit check to flag transactions submitted by a licensee (except USEC) which contain material type/owner code combinations not required to be reported by licensees. The check will apply to detail lines with no related obligated records and owner code "J."	Important	In Test	
50109	For shipments from V RISs to a licensee, if an action code B document is received from the licensee with zero lines, NMMSS should not copy the detail lines from the action code A document. NMMSS should flag compatibility error on the action code B document stating that detail lines are required. For V RIS shipments involving "G" owner code material, the receiver should be unable to submit a B zero line document.	Important	To be reviewed by CCB.	
50110	An obligation exchange transaction with an incorrect action date (future date) resulted in the assignment of the error to the incorrect RIS party. The edit needs to be revised to make the correct assignment.	Non-critical	In Test	
50111	A licensee waste shipment using the incorrect use code resulted in an incorrect error message. The error message needs to be corrected.	Important	TBD	
50112	To correct format and misspelled word in report header.	Non-critical	In Test	
50113	To prevent backout generated transaction use of discontinued owner code.	Very Important	In Test	
50114	The I-018-1 report was pulling reported inventory for March and September reports. The report should pull generated inventory for all periods, since licensees no longer are required to report inventory at the end of March and the end of September.	Important	In Test	
50115	For the TJ-6M report, user (Jim Bird, DOE-OR) requested that the TJ-6M report include the transaction series (shipper-receiver-transfer number-corr#-PC-AC) to be listed with the detailed error information.	Non-critical	TBD	
50117	In conjunction with SCR #50100. The NMMSS database needs to be modified to allow for the changes under negotiation with the IAEA on Code 10 to include PIL data. The material description code used by IAEA facilities needs to require that field 1 be a zero, field 2 be a zero, and field 3 be a zero.	Non-critical	Test	
50118	Transaction FYC-FZEI-000007-A-A contained detail lines with G owner code without project numbers. The transaction should have been flagged with errors.	Non-critical	TBD	

⁴Note: SCR numbers in bold affect facilities. Other numbers affect internal NMMSS operations only.
