Mr. George B. Stramback
Manager, Regulatory Services
General Electric Company
1989 Little Orchard Street, M/C 365
San Jose, CA 95125-1030

SUBJECT: GENERAL ELECTRIC COMPANY REQUEST FOR WITHHOLDING
INFORMATION FROM PUBLIC DISCLOSURE FOR QUAD CITIES NUCLEAR
POWER STATION, UNIT 1 (TAC NO. MC1404)

Dear Mr. Stramback:

By letter dated February 24, 2004, Exelon Generation Company, LLC, submitted an affidavit dated February 20, 2004, executed by you requesting that the information contained in the following document be withheld from public disclosure pursuant to Title 10 of the *Code of Federal Regulations*, Section 2.390 (10 CFR 2.390):

GE Responses to NRC Lost Parts Analysis RAls, dated February 20, 2004.

A non-proprietary copy of this document has been placed in the Nuclear Regulatory Commission's (NRC's) Public Document Room and added to the Agencywide Documents Access and Management System (ADAMS) Public Electronic Reading Room at ADAMS Accession Number ML040620638.

The affidavit stated that the submitted information should be considered exempt from mandatory public disclosure for the following reasons:

- (1) The information discloses a process, method, or apparatus including supporting data and analyses, where prevention of its use by General Electric's competitors without license from General Electric constitutes a competitive economic advantage over other companies; and
- (2) The information, if used by a competitor, would reduce his expenditure of resources or improve his competitive position in the design, manufacture, shipment, installation, assurance of quality, or licensing of a similar product.

We have reviewed your letter and affidavit in accordance with the requirements of 10 CFR 2.390 and, on the basis of your statements, have determined that the information sought to be withheld contains proprietary commercial information and should be withheld from public disclosure. Therefore, the version of the submitted information marked as proprietary will be withheld from public disclosure pursuant to 10 CFR 2.390(b)(5) and Section 103(b) of the Atomic Energy Act of 1954, as amended.

Withholding from public inspection shall not affect the right, if any, of persons properly and directly concerned to inspect the document. If the need arises, we may send copies of this information to our consultants working in this area. We will, of course, ensure that the consultants have signed the appropriate agreements for handling proprietary information.

If the basis for withholding this information from public inspection should change in the future such that the information could then be made available for public inspection, you should promptly notify the NRC. You should also understand that the NRC may have cause to review this determination in the future, for example, if the scope of a Freedom of Information Act request includes your information. In all review situations, if the NRC makes a determination adverse to the above, you will be notified in advance of any public disclosure.

If you have any questions regarding this matter, I may be reached at 301-415-2863.

Sincerely,

/RA by GDick for/

Lawrence Roszbach, Project Manager, Section 2
