\_\_\_\_\_  
Telephone: \_\_\_\_\_

BASIS FOR TERMINATION AND/OR RETIREMENT: All operations at  
Foster + Gross has stopped as of April 15, 2005. All radioactive  
blood sources, reference vials, and markers were removed and  
shipped to an appropriate license holder.

TERMINATION DOCUMENTATION

1. License termination meets Type I criteria: Y  N
- Licensee used sealed sources only and the most recent leak test demonstrates that they did not leak while in the licensee's possession
  - Licensee used radioactive material with  $T_{1/2} \leq 60$  days and it has decayed to less than the activity in 10 CFR Part 20 Appendix C
2. License termination meets Type II criteria: Y  N
- Licensee possessed and used only sealed sources but cannot demonstrate that the sources did not leak while in the licensee's possession
  - Licensee possessed unsealed radioactive material with  $T_{1/2} \leq 60$  days but the maximum activity authorized under the license has not decayed to less than the quantity specified in 10 CFR Part 20, Appendix C
  - Licensee possessed unsealed radioactive material with  $T_{1/2} > 60$  days but  $\leq 120$  days.
  - Licensee possessed  $^{14}\text{C}$  or  $^3\text{H}$  but the total activity(s) and use authorized under the license warrants decommissioning under Type II (describe rationale above)
