Mail Control 137072  
or Report No(s).

License No(s). 47-17746-01

Docket No(s). 030-13267

Name of Licensee: Thomas Memorial Hospital

Name of Participant(s): Barry Davis - RSO

Telephone No. 304-766-3600

Subject: Thomas Memorial License Amendment

(NOTE: This will be used as the  
Documents Title in ADAMS)

Summary: In order to update the license, I need the following additional information:

1. Manufacturer and Model number for the gadolinium 153 sealed sources OR the shipping papers and a request to remove the sealed sources from the license. Mr. Davis stated that they will probably want to remove gadolinium 153 from the license.
2. Possession limit for 35.300 materials. According to Mr. Davis, 1000 millicuries is more than adequate for their program.

I also informed Mr. Davis that the strontium calibration sources that were previously listed on the license would be removed. The activity of these sources was less than 2 millicuries each, therefore they are covered by 10 CFR 35.65.

Mr. Davis will fax the information for the gadolinium 153 sources.

Action Required: wait for information
