SUBJECT: LOUDOUN HOSPITAL CENTER, LICENSE AMENDMENT, CONTROL NO.  
137011

Dear Mr. Huebbers:

This refers to your license amendment request. Enclosed with this letter is the amended license. Please note that your license was written in a format compatible with the revised 10 CFR Part 35, effective October 24, 2002.

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license. We understand that there have been no changes in procedures, personnel, equipment, or facilities, and that the hospital's name remains the same, but may be modified at a later date. Pursuant to 10 CFR 30.34, an amendment to your license may be necessary prior to modifying your licensed name. Please note the last condition on your license indicates that, "This license condition applies only to those procedures that are required to be submitted in accordance with the regulations." Therefore, any procedures submitted that were not required by regulation to be submitted, e.g., calibration of dose calibrators, will not be considered a part of your license and were not reviewed during the licensing process. These procedures will be reviewed during inspections, as necessary. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14).
