Subject: Dry or Wet Type Lint Collector

Dear Ms. Janda:

Per our conversation, I am contacting you to detail what will be done with the lint and/or other debris collected from the dryer exhaust by the dry or wet type lint collector. Per our current practice this material is considered ETI's secondary waste and as such is collected and transferred to a waste processing facility for final disposition. If you have additional questions related to this please contact me at your convenience.

Sincerely,

A handwritten signature in black ink that reads "Mark Fellows". The signature is written in a cursive, flowing style.

Mark Fellows
