NRC 2005-0075
10 CFR 71.101(f)

U.S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington, DC 20555

Point Beach Nuclear Plant Units 1 and 2
Docket 71-038

10 CFR Part 71 Quality Assurance Approval for
Radioactive Materials Package 378

In accordance with the requirements of 10 CFR 71.101(f) and as specified in the Commission's letter to Nuclear Management Company, LLC (NMC) dated April 21, 2005, this letter requests renewal of the NMC quality assurance (QA) program for Radioactive Materials Package Approval Number 378, which expires July 31, 2005.

Transportation activities performed under 10 CFR 71 will be conducted in accordance with the NMC quality assurance program. The current description of the QA program is contained in the Quality Assurance Topical Report (QATR). The QATR was submitted by NMC to the Commission on October 31, 2003, and supplemented by letters dated July 23, 2004, September 22, 2004, November 8, 2004, and December 3, 2004. The QATR was approved by the Commission via letters and enclosed Safety Evaluations dated January 13, 2005, and March 24, 2005.
