I called Carlos Rivera, UTC RSO, and we discussed the renewal application. The license was last renewed in 1993 and the renewal application was a reworking of the '93 application. I suggested he re-submit the application using NUREG-1556, Vol. 7. I explained he could use Appendix C. We discussed what information should be included and to review the "response from applicant" section for each item in section 8. Specifically we discussed including information regarding training including frequency, assessing effectiveness, training for ancillary personnel and the qualifications of the instructors. The original application did not clearly state who would be RSO and listed four UTC personnel including their resumes. We discussed that only one person would be listed on the license as RSO. Mr. Rivera stated he would use Vol. 7 and submit a new application. He agreed to get his response back to me by Monday July 25, 2005.
