PROGRAM SCOPE

Licensee is a unit of a large hospital group located in Minneapolis, Minnesota. Licensee has a medium sized nuclear medicine program conducting routine imaging and diagnostic procedures. The licensee has four techs who performs approximately 12 procedures per day. This hospital receives its radiopharmaceuticals in the form of unit doses from Cardinal Health. Licensee does perform conventional brachytherapy, eye plaque treatments and prostate seed implants.

Performance Observations

The inspector toured the facilities and interviewed authorized users/staff members. Each appeared knowledgeable in radiation safety and isotope handling techniques. Package receipt procedures were demonstrated for the inspector as well as rad waste handling practices. Independent surveys by the inspector did not detect any abnormal reading and were within the expected range.

The inspector observed the nuclear medicine staff perform injections of radiopharmaceuticals. Techniques employed by the staff demonstrated good handling practices as well as adequate knowledge of radiation safety.

The inspector reviewed the written directives for conventional brachytherapy, eye plaque treatments and prostate seed implants. No abnormalities were observed.
