Subject: Request the addition of a New Radioactive Waste Storage Area

RE: License 13-15151-01

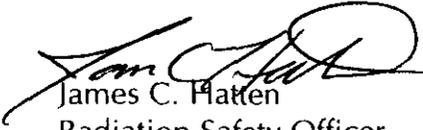

Dear Sir or Madam:

Request the addition of the attached area for the storage of radioactive waste. The area will be secured at all times. The radioactive waste area is located inside the building with a securable-gated fenced area with limited access.

Also request permission to release the current storage area for unrestricted use after the completion of a close out survey. The area has only been used for the storage of I-131 waste and sealed sources. All of the present I-131 waste has almost decayed for ten half-lives. Final disposal is expected prior to the move to the new area. The close out survey will be documented in a similar fashion as the last couple surveys performed for this purpose. The close out survey will be kept on file for your agency's review.

We hope that this information is sufficient to grant our request. If you have any questions regarding this amendment request, please contact me at (800) 383-0468. Thank you.

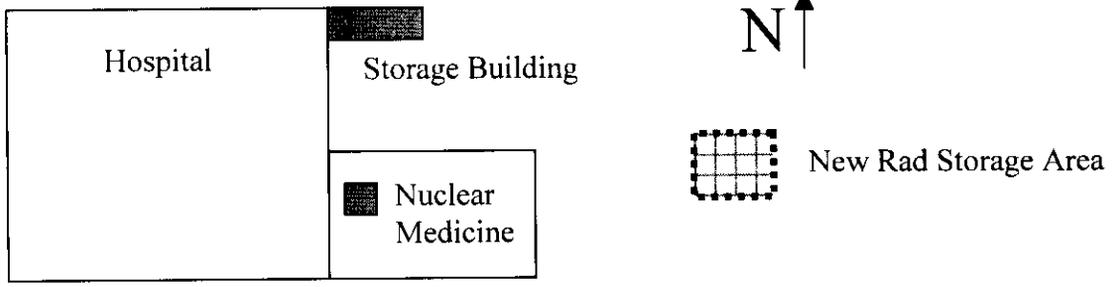

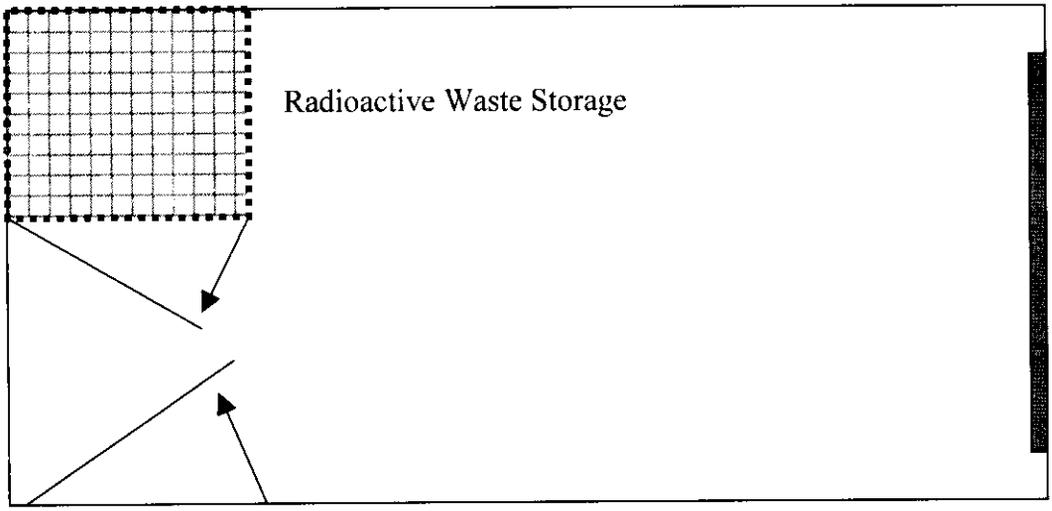

Sincerely,

James C. Hatten  
Radiation Safety Officer
