Mr. R. T. Ridenoure
Vice President - Chief Nuclear Officer
Omaha Public Power District
Fort Calhoun Station FC-2-4 Adm.
Post Office Box 550
Fort Calhoun, NE 68023-0550

SUBJECT: FORT CALHOUN UNIT 1 - NOTIFICATION REGARDING THE RESPONSE TO
GL 2004-01, "REQUIREMENTS FOR STEAM GENERATOR TUBE
INSPECTIONS" (TAC NO. MC4821)

Dear Mr. Ridenoure:

On August 30, 2004, the U.S. Nuclear Regulatory Commission (NRC) issued Generic Letter (GL) 2004-01, "Requirements for Steam Generator Tube Inspections." The purpose of GL 2004-01 was to obtain information that would enable the NRC staff to determine whether licensee's steam generator (SG) tube inspection programs comply with the existing tube inspection requirements (the plant Technical Specifications) in conjunction with Appendix B to Title 10 of the *Code of Federal Regulations* Part 50.

By letter dated October 29, 2004, Omaha Public Power District responded to GL 2004-01 for Fort Calhoun Station, Unit 1. The NRC staff's review of your response to the GL did not identify any concerns with the inspection practices employed at Fort Calhoun Station, Unit 1. The staff, therefore, concludes that your SG tube inspection practices are in compliance with the existing tube inspection requirements.

If you have any questions regarding this matter, please contact Alan B. Wang at (301) 415-1445.

Sincerely,

/RA/

Alan B. Wang, Project Manager, Section 2
Project Directorate IV
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

Docket No. 50-285
