		Docket No(s). 03034258						
<p>Name of Licensee: Tennessee Valley Authority</p> <p>Name of Participant(s): Terry Knuettel/James Colagross/Steven Courtemanche</p> <p>Telephone No. 423-751-6673/(NRC) 610-337-5075</p> <p>Subject: Possible Need for a Corrected Copy to the License. <small>(NOTE: This will be used as the Documents Title in ADAMS)</small></p> <p>Summary: Mr. Knuettel called and stated that he had Mr. Colagross on conference call. They wanted to discuss the most current amendment to the license and the impact of it on their licensed program. The licensee was concerned that License Condition Nos. 21 and 23 do not specifically state that the licensee may perform certain activities involving the gauges as specified in License Condition 14 of the previous amendment. I informed the licensee that they would still be authorized to perform the activities under the tie-down condition, i.e., License Condition No. 27. I would, however, get back in touch with them after checking with management and the possible need to change the two conditions.</p> <p style="margin-left: 40px;">10:30 After looking over the license and speaking with management, I called Mr. Knuettel back. I explained that License Condition Nos. 21 and 23 are standard boilerplate conditions and appear the same in every license they are in. However, License Condition No. 20 refers to all of the non-routine activities for which the licensee is authorized and takes precedence over the above two license conditions. Therefore, no corrected copy of the license will be required as there has been no changes in what the licensee is authorized to do. I thanked Mr. Knuettel for reviewing the license so closely and that I was able to address his concerns.</p> <p>Action Required: Place telephone log in ADAMS.</p>
