Subject: RE: Rod pressure call

Brian,

This email is to document our (NRC/Westinghouse) conference call regarding our response to the Staff's Draft SER on WCAP-8963-P-A, Addendum 1, Revision 1 documented in our letter to the NRC (LTR-NRC-05-39). Based on this call, we understand the following:

- Item 1: The Staff will revise the wording to include Optimized ZIRLO.
- Item 2: No comment from the staff on suggested clarification.
- Item 3: Staff agreed that the suggested clarification is acceptable.
- Item 4: Staff understands that we looked at all transients. Will modify the sentence using some of our suggested wording and will retain "locked rotor" in a parenthetical phrase.
- Item 5: Acceptable to staff.
- Item 6: Westinghouse agrees that the information that we previously marked as proprietary is acceptable to release (i.e., not proprietary to Westinghouse).
- Item 7: The Staff will revise the wording to capture that the methodology is applicable to Zircaloy-4, ZIRLO and Optimized ZIRLO.

Westinghouse understands that the Staff will document this email as a formal reply from Westinghouse with regards to the conference call.

Westinghouse appreciates the NRC's support in reaching closure on this topical report.

Very Respectfully,
William H. Slagle
