Subject: information need to close RIII-2003-A-0054

Ross

I was auditing RIII-2003-A-0054 and noted that we are missing (1) your initial conversation with the CI that occurred in December 2002 or January 2003; (2) the following up conversation in which you told the results of the inspection to the CI; (3) the conversation record where the CI told you that the s/he has been blackballed

For the blackballing issue I need a conversation records that address

1. What adverse action was taken against the CI?
2. What jobs were posted, how did s/he apply, who told the CI that s/he was not hired, and the reason provided?
3. Why does the CI believe the adverse action was taken as a result of the protected activity?
4. If we investigate does the CI agree to the release of his name

Please provide the three conversation records by July 24, 2003

The issue discussed by RIII-2003-A-0054 was:

An individual was concerned that a condition report provided from the licensee to the Department of Labor Administrative Law Judge (ALJ) has a false statement in it. The individual stated that the report was labeled as Exhibit #46 and that the last sentence on page 4 was added after the stated date of August 4, 2000. The individual speculated that the statement was added for the ALJ to see that your supervisor closed your audit findings before you talked to the NRC, thus making your statement that you discussed safety significant issues with the NRC meaningless because there were none to discuss.
