In response to your E-mail about my conversations with The CI: As I've told you before, I've had so many with him since the November 2000 Holtec meeting that I can't recall any specific details other than what I already told you and you documented in the E-mail to me. For the last phone call that he called me on, can't recall what date, he told me about some job out east that he thought he had but at the last minute the company ran out of money and the job fell through. He thought that it was the result of him being blackballed by his old employer so other people wouldn't hire him. Do you want me to contact him and get more details, on who, what where?
