Attachments: MNGP peregrine summary.doc; falconID.doc; PERESUM.DOC; breeders.doc

Jim

The peregrine documents you requested are attached.

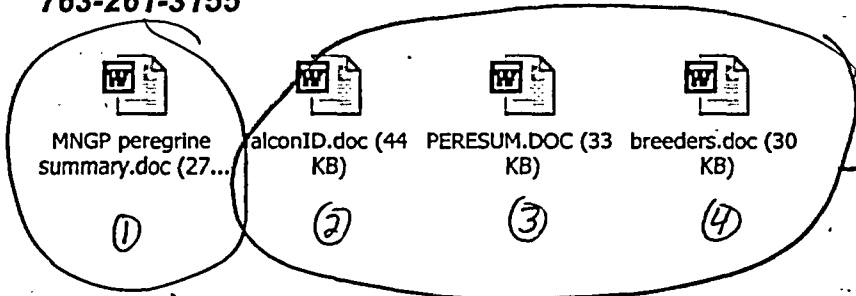

The first document is a summary of the data I have on the MNGP nest box. It includes the young produced each year and the adults that were identified each year. In some year one or both of the adults may not have been identified.

The second document lists all of the young produced at all of Xcel Energy's nest boxes each year.

The third document is a year-by-year summary of the production of young that took place at each nest box. I do not have 2005 data yet so it is only up to date through 2004.

The fourth document is a list of the breeding peregrines that we were able to identify at each of our sites each year the nest box was used.

Brief Summary of Peregrine Falcon Nesting at NSP Facilities

		Young/year
1988	Nest box installed on stack at A. S. King plant in fall	
1989	Single adult male falcon at nest	
1990	Pair of falcons nest; Mae the female is still present in 2001 Two young augmented to nest and successfully fledge	2
1991	Nest box installed on Sherco Unit III stack in fall Three young falcons hatched at King Plant	3
1992	Nest box installed on stack at Black Dog Plant in summer Nest box installed on off gas stack at Monticello Plant in fall Pair of falcons nesting at Sherco but eggs infertile Two young falcons augmented to Sherco box, successfully fledge Three young falcons hatch at King	5
1993	Single female falcon present at Monticello Pair of peregrines nest at Black Dog; three young produced Three young falcons hatched at King Plant Four young falcons hatched at Sherco Plant	10
1994	Nest box installed on stack at Minnesota Valley Plant Nest box installed on containment dome at Prairie Island Plant Two young falcons hatched at King Three young produced at Sherco Three young produced at Black Dog	8
1995	Three young hatched at Monticello Plant; Pair attempt nesting at Prairie Island plant unsuccessfully Four young produced at King Plant	

	Three young falcons hatch at Sherco Plant Two peregrines produced at Black Dog Plant	12
1996	One young female fledged at King Plant Two females produced at Black Dog Two females fledged at Sherco Three young falcons produced at Monticello Two adults present but no young at Prairie Island	8
1997	One female fledged at King Plant Two females produced at Sherco Three young at Black Dog Four young falcons produced at Monticello Four young falcons hatched at Prairie Island Nest box installed at Riverside	14
1998	Two males fledged at King Plant One male and two females fledged at Sherco Two females fledged at Black Dog One female and one male fledged at Monticello One female and one male fledged at Prairie Island One female and one male fledged at Riverside Nest box installed at High Bridge	13
1999	Three females and one male fledged at King Plant Two males and one female fledged at Sherco Two males and one female fledged at Black Dog Three females and one male fledged at Monticello Three females and one male fledged at Prairie Island One female fledged at Riverside High Bridge box visited by birds nesting at the Bridge	19
2000	Two females and one male banded at King Plant No young at Sherco; new pair with juvenile female Three young females at Black Dog Two male and two female young at Monticello	

Three male and one female young at Prairie Island
 Two male and one female young at Riverside
 Two males and one female banded at High Bridge 20

2001 Two females and two males fledged at King Plant
 Two females banded at Sherco
 Two males and two females produced at Black Dog
 Three females banded at Monticello
 Four young at Prairie Island; unknown sex
 Two males and one female produced at Riverside
 One female and two males hatched at High Bridge 23

2002 One female fledged at King Plant
 One male and one female produced at Sherco (not banded)
 Three young too old to band at Black Dog
 Three females and one male banded at Monticello
 Young died prior to banding at Prairie Island
 Two females and one male produced at Riverside
 One male and one female fledged at High Bridge 15

2003 Three young (2M, 1F) fledged at King plant
 Three young (1F, 2M) banded at Sherco
 Four young hatched (all died prior to banding) at BD
