SUBJECT

Control no. 314297 – Regarding license (21-26750-01) termination amendment request by NRC Form 314 dated March 10, 2005.

SUMMARY

We discussed additional information needed, in writing, to support the termination request, as follows:

1. Confirm that S-35 was never used or possessed.
2. Confirm that studies involved only 5 to 15 microcuriws of P-32 or P-33 per experiment.
3. Confirm that all disposals of solid radwaste and liquid radwaste were made in accordance with the criteria in attachment 10.6, B. of their license application dated November 26, 2002 and License Condition 15., as applicable, and that the activity of the waste materials were indistinguishable from background, as measured by an appropriate instrument, at the time of disposal.
4. Identify any calibration/check sources (possessed when your licensed activity ceased) by isotope, activity, physical form, and show how these were properly disposed of, i.e. to whom transferred; a copy of a record confirming their receipt of the source(s); a copy of their license which shows their authorization to possess the source(s) or alternatively, their NRC or Agreement State License Number; and a leak test record, current at the time of transfer, showing the non-leaking status of each source, except those for which either the form of the source (i.e., a gas) or the activity of the source was sufficiently low so as to be exempted from the leak test requirement.
5. Provide a copy of both a direct radiation and a wipe test survey of the restricted area being requested for release for unrestricted use (performed after the last use and after the removal of all licensed material from the restricted area, including radwaste) which demonstrates that the area meets NRC criteria for release for unrestricted use.

ACTION REQUIRED

Licensee to respond as requested. Licensee to provide requested documentation as additional information for control No. 314297 and to provide it to me by facsimile (630-515-1259), no follow-up hard copy is needed. Licensee may call me (630-829-9829) with any questions..

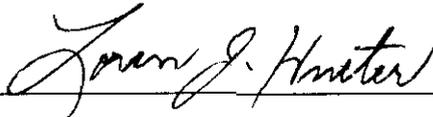

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this conversation record will be available electronically in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.
