

UNITED STATES
NUCLEAR REGULATORY COMMISSION
REGION III
2443 WARRENVILLE ROAD, SUITE 210
LISLE, ILLINOIS 60532-4352

JUN 30 2005

Gregory P. Crouch, M.S.
Radiation Safety Officer
Indiana University
Jordan Hall, Room 071
1001 E. Third Street
Bloomington, IN 47405-6801

Dear Mr. Crouch:

Enclosed is Amendment No. 75 to your NRC Material License No. 13-00108-05 in accordance with your request. Please note that the changes made to your license are printed in **bold font**.

Please be advised that we cannot authorize you to release your storage facility located at the Kiln building identified in letter dated March 28, 2005, for unrestricted use (even by other members of your staff) until we have received and reviewed a copy of the results of your close-out survey. The survey should consist of exposure rate measurements to show that all sources of radioactive material have been removed, and contamination checks of areas where radioactive materials were stored.

Please note that we have modified License Condition no. 18 to authorize decay-in-storage for radioactive material with physical half-lives of less than 120 days in accordance with NRC Regulatory Issue Summary 2004-17, dated November 23, 2004.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

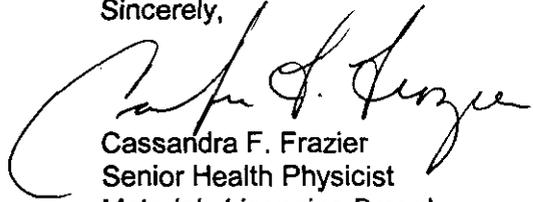

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

JUN 30 2005

The enclosed license document is exempt from public disclosure in accordance with 10 CFR 2.390, because its disclosure to unauthorized individuals could present a security vulnerability.

Sincerely,

Cassandra F. Frazier
Senior Health Physicist
Materials Licensing Branch
