Alan,

Sorry to bother you again, I have a couple further questions for you related to the EA I am drafting to remove the Philadelphia Plant from the R&H license.

6. How would you describe the area of the Philadelphia Plant, industrial, commercial, mixed residential/commercial, etc.?

7. When did the work with licensed material stop? I know the last work with unsealed material was in 1974. When were the last Ni-63 sealed sources removed from this facility?

Thank you.

John Nicholson
