SUMMARY OF INFORMATION COLLECTION REQUEST

Title: NRC Form 748, "National Source Tracking Transaction Report," Proposed New Form

Current Burden/Responses: None

Proposed Burden/Responses: 412 hours/2587 responses

Frequency of Response: On occasion, initially

Reasons for Changes in Burden/Responses:

The proposed rule, "National Source Tracking of High-Risk Sealed Sources," would establish a National Source Tracking System to track sources containing radioactive material of concern. The rule would establish a new NRC Form 748 that licensees may use to enter the data. Alternately, licensees may enter the data on-line.

Level of Concurrence:

Branch Chief
Rulemaking and Guidance Branch
Division of Industrial and Medical Nuclear Safety
Office of Nuclear Material Safety and Safeguards

Recordkeeping Requirements in Accordance with the Retention Periods for Records Rule:

Not applicable.

Abstract:

The proposed rule, 10 CFR Parts 20, 32, and 150, "National Source Tracking of High-Risk Sealed Sources," would establish a National Source Tracking System to track sources containing radioactive material of national concern. The system would provide greater source accountability by requiring that sources of concern be tracked from their manufacture to use, transfer, and final disposal. Licensees must initially enter all relevant source data and then update the data whenever a source is transferred or disposed of. The data for new sources are entered upon their manufacture. Licensees may complete NRC Form 748 or enter the data on-line.
