

RIC 2005

Session H2

Licensing Issues

Reactor Security Licensing
Daniel H. Dorman
Deputy Director
Division of Nuclear Security
March 8, 2005

Post-9/11 Security Enhancements

- October 2001 Advisory
- February 2002 Order - Interim Compensatory Measures
- January 2003 Order - Access Authorization
- April 2003 Orders:
 - Security Officer Work Hour Limits
 - Security Officer Training and Qualification
 - Supplement to Design Basis Threat

Establishing the Licensing Basis

- April 2003 Orders required new:
 - Physical Security Plan
 - Contingency Response Plan
 - Training and Qualification Plan
- Content of Plans
 - Conform to NRC-approved template
 - Provide basis for compliance with all requirements
- NRC Staff Review of the Plans
 - Efficient review of generic aspects
 - Focus staff effort on site-specific aspects
 - All plans approved by implementation date (10/04)

Stabilizing the Regulatory Framework

- Rulemaking to codify the post-9/11 Order requirements
- 10 CFR 73.1, Design Basis Threat
- 10 CFR Part 26, Fitness for Duty
- 10 CFR 73.21, Safeguards Information
- 10 CFR Part 73
 - Physical Protection
 - Access Authorization
 - Security Officer Training

Safety-Security Interface

- Potential safety impacts on security
- Potential security impacts on safety
- Importance of integration between:
 - Security
 - Operations
 - Engineering
 - Emergency Planning

Conclusion

- Safety and Security are more closely linked than ever before
- Stability in the regulatory framework requires effective integration at the interface
