Brian,

Earlier this morning, in a phone conversation with Pete, in line with the attached letter we issued yesterday concerning resubmittal of information that was marked as proprietary information, I requested USEC to if practicable, also resubmit to the NRC, as publically available documents, the portions of documentation that are currently marked as Export Controlled Information (ECI), but which in actuality do not contain any ECI. I provided the example of NRC's earlier request to USEC in the form of an RAI to include the ISA methodology description provided in the ISA Summary, which is marked ECI, in Chapter 3 of the license application. Responding to the RAI, USEC copied the appropriate sections from the ISA Summary into Chapter 3 without the ECI marking. Pete acknowledged the request indicating that this would be a very significant undertaking on USEC's part as ECI documents are not portion-marked. He said that he would discuss this internally and with DOE, and get back to me on whether this can be done and, if so, by when.

Pete also indicated that USEC was trying to issue today, an ER RAI response which contained an attachment that was deemed proprietary per the security criteria. He asked whether, contrary to the directions contained in the attached letter, USEC could submit the response attachment in question as proprietary at this time since the NRC had requested the response by today. I said that USEC could do that as long as USEC resubmits, as appropriate, the information later in response to the NRC request contained in its July 7, 2005, letter. He said that as previously indicated, USEC anticipates resubmitting the information in response to the July 7th letter by August 15, 2005.
