U.S. Nuclear Regulatory Commission  
Document Control Desk  
Attention: Director, Office of Nuclear Reactor Regulation  
Washington, DC 20555

Reference: Docket Number 50-186  
University of Missouri – Columbia Research Reactor  
Amended Facility License R-103

Subject: Written communication as specified in 10 CFR 2.202 regarding the  
implementation of Nuclear Regulatory Commission Order (EA-05-007),  
“Additional Security Measures on the Transportation of Radioactive  
Material Quantities of Concern”

As specified in NRC Order EA-05-007, “Additional Security Measures on the  
Transportation of Radioactive Material Quantities of Concern (RAMQC),” dated July 19,  
2005, the University of Missouri – Columbia Research Reactor (MURR) is notifying the  
NRC, as per Section III.B.1(2) of the Order, that compliance with any of the requirements  
is unnecessary in our specific circumstances.

MURR does not currently transport RAMQC as delineated in Table A of Enclosure 1,  
Attachment B, to the Order. Further, we do not anticipate transportation of RAMQC.  
We therefore elect not to implement the additional security measures because they are not  
applicable to our current or planned activities.

If conditions change that require us to ship RAMQC, the facility will inform the NRC  
ninety days in advance of the first such RAMQC shipment.

Sincerely,

Ralph A. Butler, P.E.  
Director, MURR
