CENTER FOR NUCLEAR WASTE REGULATORY ANALYSES

TRIP REPORT

SUBJECT: Attend the Short Course "The Risk Communication Challenge"
DATE/PLACE: May 11–13 2005, Boston, Massachusetts
AUTHOR: Miriam R. Juckett
PERSONS PRESENT: Approximately fifty international participants (primarily US and Canadian) attended the course, primarily from the Communications sector.

BACKGROUND AND PURPOSE OF TRIP:

The Harvard School of Public Health annually holds a short course entitled "The Risk Communication Challenge." The course covers the fundamentals of communicating information to the public and drafting messages in a clear, effective way. Center and NRC staff have previously attended this course to enhance our communications abilities, particularly in the area of Public Outreach and other stakeholder interactions. M. Juckett attended this course for training as the new Principal Investigator for Public Outreach.

SUMMARY OF PERTINENT POINTS AND ACTIVITIES:

The course was held over three days with several speakers giving oral presentations and lectures. Topics included: fundamentals of risk communication, real-life examples of risk communications, risk perception, the importance of trust, audience responses, effective communication strategies, etc. Discussion was encouraged during the lectures, and due to the diversity of class participants, a wide range of viewpoints were represented. A large group activity was conducted in which a mock press release was prepared. See attached agenda for additional information on the course.

CONCLUSIONS:

The course was beneficial and informative, and helped prepare attendees for risk communications activities and stakeholder interactions.

PROBLEMS ENCOUNTERED:

None.

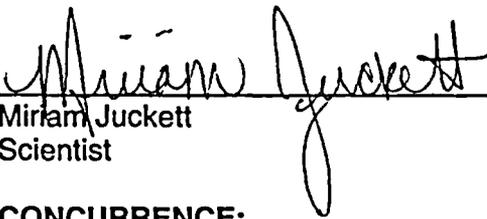

PENDING ACTIONS:

None.

RECOMMENDATIONS:

This course is highly recommended for staff involved in public outreach or stakeholder interactions.
