Subject: Request for Extension on Submittal of Semi-annual Ground Water Monitoring Report

July 29, 2005

Julia:

The semi-annual ground water monitoring report for the Lucky Mc Mill Site, SUA-672, is due by the end of this month. We have had some technical and logistic problems that delayed the completion of well sampling until late June. As a consequence, the data will not be available from our vendor analytical laboratory until August 5, 2005. We request an extension of the submittal due date to August 12, 2005. Your help on this matter will be greatly appreciated. Please call me if you have any questions. Thank you.

Sincerely,

Tom Hardgrove
