Subject: Phone call summary on open seismic issues

Brian,

A few minutes ago I asked Kelly Coriell of USEC Inc. why ASCE 7-2002 was not included in Rev 4 of the license application. In USEC's response (fourth item, p. 14 of the June 3, 2005 letter from Steven A. Toelle) to our request for additional information regarding use of ASCE 7 for design, USEC had indicated that it would commit to the applicable sections of ASCE 7-2002 and that Section 1.4.7 of the License Application would be revised to reflect this commitment. I also asked Kelly about the status of USEC's site specific study to confirm that the design response spectra for a 10,000-year return period earthquake developed using a scaling technique was adequate. Kelly said that she would look into these matters and get back to me.
