Document Control Desk  
Attn: Director, Director  
Office of Nuclear Reactor Regulation  
Washington, DC 20555

Docket 50-2, License R-28

**Subject: Order for Additional Security Measures on the Transportation of RAMQC, EA-05-007**

The University of Michigan's Ford Nuclear Reactor is electing NOT to implement the Additional Security Measures on the Transportation of RAM-QC prescribed in EA-05-007, *Order Imposing Additional Security Measures* because they are not applicable to activities at this time. Conditions may change and would require the University of Michigan to transport radioactive material quantity of concern (RAMQC). The University of Michigan will notify the Commission ninety (90) days in advance of the first RAMQC shipment and will report compliance to the Commission as required by the Order before performing the first RAMQC shipment.

If there are questions about this response to Order EA-05-007, please contact Christopher W. Becker at (734) 320-1711.

I declare under penalty of perjury that the foregoing is true and correct.
