JUL 15 2005

Cheryl M. Culver-Schultz, M.S.
Radiation Safety Officer
William Beaumont Hospital
3601 W. 13 Mile Road
Royal Oak, MI 48073-6769

Dear Ms. Culver-Schultz:

Enclosed is Amendment No. 77 to your NRC Material License No. 21-01333-01 in accordance with your request. Please note that the changes made to your license are printed in **bold font**.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

In correspondence dated April 11, 2005, and July 15, 2005, you requested the release of your former facility located at 1818 Maplawn, Troy, Michigan. The NRC staff has reviewed your final status surveys. Based on its review, the staff has concluded that all licensable radioactive material has been removed from this facility and residual radioactive material attributable to licensed activities does not exceed current NRC criteria.

Based on these conclusions no further remediation or actions with respect to NRC regulated material is required. Your facility at 1818 Maplawn, Troy, Michigan is suitable for unrestricted use.

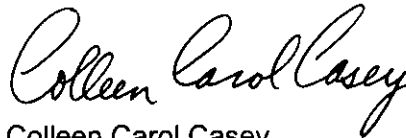

This amendment makes a number of changes, corrections and revisions to your license, as I discussed with you in several telephone conversations on July 12, 2005, and July 13, 2005. In addition, your new location of use has been approved and is listed in Condition No. 10.F. Condition No. 18 now contains language that clarifies the materials it is intended for and it incorporates the provisions allowed by Regulatory Issue Summary 2004-017 for decay-in-storage of waste materials without a mandatory wait of ten half-lives. Condition Nos. 10.A. through 10.E. now contain language that clarifies the specific types of materials authorized at each location of use.

If you have any questions or comments concerning this amendment, please contact me at either (630) 829-9841 or (800) 522-3025.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>. The enclosed license document is exempt from public disclosure in accordance with 10 CFR 2.390, because its disclosure to unauthorized individuals could present a security vulnerability.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

Sincerely,

A handwritten signature in black ink that reads "Colleen Carol Casey". The signature is written in a cursive style with a large initial "C" and a long, sweeping tail on the "y".

Colleen Carol Casey
