

August 11, 2005

APPLICANT: System Energy Resources, Inc.

FACILITY: Grand Gulf Early Site Permit Site

SUBJECT: SUMMARY OF PUBLIC MEETING TO RECEIVE COMMENTS ON DRAFT NUREG-1817, DRAFT ENVIRONMENTAL IMPACT STATEMENT FOR THE GRAND GULF EARLY SITE PERMIT (ESP) APPLICATION (TAC NO. MC1379)

On Tuesday, June 28, 2005, members of the U.S. Nuclear Regulatory Commission (NRC or the staff) held a public meeting in Port Gibson, Mississippi, to describe the results of the staff's environmental review and to receive comments on the recently-issued NUREG-1817, "Environmental Impact Statement for an Early Site Permit (ESP) at the Grand Gulf Site, Draft Report for Comment." The public meeting was preceded by an one-hour open house to allow one-on-one discussions between the NRC staff and members of the public on an informal basis. The staff also remained after the meeting to have informal discussions with interested members of the public. During the public meeting, formal presentations were made by the staff to describe the overall licensing process under 10 CFR Part 52, the National Environmental Policy Act of 1969 (NEPA) review process, and the results of the staff's environmental evaluations as documented in the draft NUREG-1817.

The formal presentations by the NRC staff were followed by a question and answer session. Members of the public were then invited to provide formal comments for the record. Approximately 180 people attended the meeting, with about two dozen individuals providing comments. Attendees included representatives of the NRC, SERI, the nuclear industry, State and local agencies, the press, and members of the public.

Attachment 1 is a list of meeting attendees and their affiliation. Attachment 2 is a corrected transcript and copies of written statements provided to the NRC staff during the public comment meeting. Attachment 3 is a copy of the NRC slides presented during the meeting.
