

August 29, 2005

Mr. Robert E. Gamble
Manager, Regulatory Services
General Electric Company
175 Curtner Avenue
San Jose, CA 95125

SUBJECT: REQUEST FOR WITHHOLDING INFORMATION FROM PUBLIC
DISCLOSURE, VERMONT YANKEE NUCLEAR POWER STATION
(TAC NO. MC0761)

Dear Mr. Gamble:

By letter BVY 05-072 dated August 1, 2005, Entergy Nuclear Vermont Yankee, LLC submitted General Electric Company (GE) affidavit dated July 30, 2005 (Attachment 6 to letter BVY 05-072) and two GE affidavits dated July 29 and July 30, 2005 (Attachment 12 to letter BVY 05-072) to the Nuclear Regulatory Commission (NRC). These affidavits requested that the information contained in the following documents be withheld from public disclosure pursuant to Title 10 of the *Code of Federal Regulations* (10 CFR) Section 2.390:

“Margin in GE Analytical Methods Supporting Vermont Yankee EPU [extended power uprate] Submittal, dated July 29, 2005,” (Attachment 1 to letter BVY 05-072)

“Responses to NRC RAIs [requests for additional information] SPSB-51 and SRXB-7, 8, 9, 10, 13, 14, 15, 16, 17, 19, 20, 21, 22, and 23, dated July 29, 2005,” (part of Attachment 9 to letter BVY 05-072)

“Responses to NRC RAIs SRXB-24-58, dated August 1, 2005,” (part of Attachment 9 to letter BVY 05-072)

Nonproprietary copies of these documents (Attachments 2 and 10, respectively, to letter BVY 05-072), has been placed in the NRC's Public Document Room and added to the Agencywide Documents Access and Management System Public Electronic Reading Room.

Each affidavit stated that the submitted information should be considered exempt from mandatory public disclosure for the following reasons:

- (4) a. Information that discloses a process, method, or apparatus, including supporting data and analyses, where prevention of its use by General Electric's competitors without license from General Electric constitutes a competitive economic advantage over other companies;
- (4) b. Information which, if used by a competitor, would reduce his expenditure of resources or improve his competitive position in the design, manufacture, shipment, installation, assurance of quality, or licensing of a similar product.

We have reviewed your application and the material in accordance with the requirements of 10 CFR 2.390 and, on the basis of your statements, have determined that the submitted information sought to be withheld contains proprietary commercial information and should be withheld from public disclosure.

Therefore, the version of the submitted information marked as proprietary will be withheld from public disclosure pursuant to 10 CFR 2.390(b)(5) and Section 103(b) of the Atomic Energy Act of 1954, as amended.

Withholding from public inspection shall not affect the right, if any, of persons properly and directly concerned to inspect the documents. If the need arises, we may send copies of this information to our consultants working in this area. We will, of course, ensure that the consultants have signed the appropriate agreements for handling proprietary information.

If the basis for withholding this information from public inspection should change in the future such that the information could then be made available for public inspection, you should promptly notify the NRC. You also should understand that the NRC may have cause to review this determination in the future, for example, if the scope of a Freedom of Information Act request includes your information. In all review situations, if the NRC makes a determination adverse to the above, you will be notified in advance of any public disclosure.

If you have any questions regarding this matter, I may be reached at 301-415-1420.

Sincerely,

/RA/

Richard B. Ennis, Senior Project Manager, Section 2
Project Directorate I
