3. The suggestion was not adopted by me, because:

Removing the vending machines from each floor is not a viable option because they serve as a convenient source for a variety of drinks and snacks for employees. The machines are stocked with nuts and raisins (Trail Mix), orange juice, and several other health conscious choices that are 600-calories or less, 7 grams of fat or less, or have less than 30% calories from fat. While fresh fruit such as apples are not available in the vending machine, fresh fruit is available in TWFN Cafeteria, the Snack & Go Store and the Nureg Cafe. The ASC will continue to provide healthy food items in each of the vending machines.
