Coastal Resources Specialist  
Consistency Review and Analysis  
New York State Department of State  
Division of Coastal Resources  
41 State Street  
Albany, New York 12231-0001

Subject: Nine Mile Point Nuclear Station, LLC  
Application for Renewal of Operating Licenses  
Coastal Management Program Consistency Determination

Dear Mr. Barr:

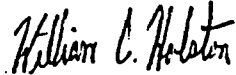

By letter dated August 6, 2004, Nine Mile Point Nuclear Station, LLC (NMPNS) submitted to you a completed Federal Consistency Assessment Form, a document entitled *Coastal Management Program Consistency Determination* that provides supporting information and documentation, an electronic copy of NMPNS' application to the U.S. Nuclear Regulatory Commission (NRC) for the license renewal of the two NMPNS units, and a printed copy of the *Environmental Report - Operating License Renewal Stage, Nine Mile Point Nuclear Station* in accordance with 15 CFR Part 930 Subpart D. On July 14, 2005, NMPNS submitted an amended license renewal application (LRA) to the Nuclear Regulatory Commission (NRC). This letter transmits a CD containing a copy of the amended LRA and a copy of its transmittal letter to the NRC.

It should be noted that no changes were made to the Environmental Report and no changes are required to the Coastal Management Consistency Certification and supporting documentation submitted to you in August 2004. Therefore, those documents are still valid relative to your review.

NMPNS is requesting review and approval of the previously submitted Coastal Management Program Consistency Certification. The Consistency Certification presents NMPNS' position that continued operation of NMP would be in compliance with the current New York State Coastal Management Program. To facilitate scheduling your review, upon receipt, NMPNS will provide a copy of the new NRC review schedule. The NRC is expected to issue the new schedule within the next few weeks.

If you have any questions or comments, please call Kent Stoffle, Principal Engineer, Environmental, at (315) 349-1364.

Sincerely,

William C. Holston  
Manager, Engineering Services
