RE: Nine Mile Point Nuclear Station, LLC
Application for Renewal of Operating Licenses
Clean Water Act Section 401 Application #7-3556-00013/00025

Dear Mr. Feltman:

On July 14, 2005, NMPNS submitted an amended license renewal application (LRA) to the Nuclear Regulatory Commission (NRC). This letter transmits a CD containing a copy of the amended LRA and a copy of its transmittal letter to the NRC for your use. It should be noted that no changes were made to the Environmental Report submitted to you in June 2004. In addition, the application for a new Clean Water Act Section 401 Water Quality Certification submitted to you by letter, dated June 30, 2005, remains valid.

As we discussed during several teleconferences prior to the above cited June 30, 2005 submittal, the Nuclear Regulatory Commission intends to issue a new review schedule within the next few weeks and we will provide a copy to you.

If you have any questions or comments, please call Kent Stoffle, Principal Engineer, Environmental, at (315) 349-1364.

Sincerely,

William C. Holston
Manager, Engineering Services
