Subject: Re: Thadani SFP memo

I've also reviewed the RES memo/report and agree that it represents substantial progress since NUREG-1738, and should be issued. The document tracks closely the information presented by C. Tinkler to the SFP technical advisory group last week (2/24), and I believe all attendees were favorably impressed with the work.

I just put memos on each of your chairs with my comments on the Thadani memo. Overall it is fine to concur, and has some very interesting insights and updates from the decommissioning SFP study. A few things could be modified slightly.

The report is back in the safe, in Glenn's folder top drawer.

Mark
