Name of Licensee:	Radiology Services
Name of Participant(s):	Roy Heltzel (licensee consultant)/ Thomas Thompson (NRC)
Telephone No.	757 410-9051
Subject:	Extension for submitting of renewal application.
<small>(NOTE: This will be used as the Documents Title in ADAMS)</small>	

Summary:	Explained to Mr. Heltzel that it is not our policy to extend date of submission of an application. Mr. Heltzel referred to a letter they received from our Headquarters Office suggesting they contact the Region for an extension of the expiration date if you cannot file the application in time. I explained that we expect that a substantial application be submitted within the expiration date and a reasonable timetable for submitting any uncompleted procedures be submitted and we would likely except this but that we do not normally extend expiration dates.
----------	--

Action Required:	Licensee submit a renewal application.

Re: Renewal reminder letter

Number of Pages (Including Cover Sheet): 2

Message:

Mr. Thompson,

This is the letter that my client received about their pending renewal. The section we discussed is marked. Please contact me at 757-410-9051 when you have a moment to advise us on how to proceed. Thank you for your help.

Roy Heltzel

GREENBRIER TECHNOLOGY CENTER
814 GREENBRIER CIRCLE, STE. H
CHESAPEAKE, VA 23320

License No. 45-25349-01MD
Expiration Date: 10/31/2005
Program Code: 02500

Gentlemen:

SUBJECT: NOTICE OF LICENSE EXPIRATION

Your U.S. Nuclear Regulatory Commission (NRC) license, specified above, will expire on the date shown.

If you wish to continue your licensed program, you should prepare and submit a renewal application on NRC Form 313, following regulations (10 CFR Parts) and licensing guidance (NUREG 1556, Volume/s) listed for your program in Enclosure 3. NRC strongly encourages the use of NUREG-1556 guidance documents because they supersede much of the guidance previously used for licensing. Further, these documents will make preparation of your renewal application and the NRC staff's review easier and quicker. If the application reflects any significant changes in your licensed program, those changes must be clearly indicated.

You must submit an application for the renewal of your license at least 30 days before the expiration date on the license. If your renewal application is filed (delivered or post-marked) before the expiration date, NRC will use discretion and your license will remain in effect until NRC takes final action on your application.

→ However, if your renewal application cannot be filed before the expiration date, you should
→ contact NRC immediately to see if you can obtain a temporary extension of the expiration
→ date. Without NRC approval of that extension request, your license expires on the
expiration date stated on the license. If your license expires, you no longer have a valid
license, but you are required to maintain all licensed materials in safe, locked storage
until your application for a license or request for termination is submitted and approved.
Use of the licensed material after the expiration of your license may subject you to
criminal and/or civil sanctions.

If you do not wish to renew your license, you must dispose of or transfer all licensed radioactive material in your possession in an authorized manner (see the appropriate requirements in 10 CFR 30.36, 40.42, or 70.38); then complete the enclosed Form NRC-314, "Certificate of Disposition of Materials" and return it before the expiration date of your license, with a request that your license be terminated. If you cannot dispose of or transfer all licensed radioactive material in your license before the expiration date, you must request a license renewal, for "storage only", of the radioactive material, to avoid enforcement action for violations involving the possession of licensable material without a valid license. Enforcement action may include a substantial monetary civil penalty that could also include daily civil penalties until you achieve compliance.

This notice of your license expiration is sent for your convenience only and does not mean that similar notices will be sent in the future. The responsibility for timely submission of the license renewal remains with the licensee. If you have any questions about this notice or license expiration/renewal, please contact the NRC Regional Office that handles your license.

Re: NRC License 45-25349-01MD

Dear Mr. Dwyer:

I am writing in reference to our NRC license 45-25349-01MD which governs our operation as a nuclear pharmacy in Chesapeake, Virginia. The current license will expire on October 31, 2005 and it is our definite intention to renew the license. It has become apparent however that we will be making significant changes and providing additional information as we update our present license. For this reason we would greatly appreciate a period of 90 days beyond the expiration date to complete our application package. We would expect to pay the normal renewal fee by September 30, 2005, but would appreciate your understanding regarding the deadline for renewal.

A correspondence of July 24, 2005 from the NRC (Washington, D.C.) directed that licensees contact the NRC immediately if a temporary extension was needed. Our health physics consultant, Mr. Roy Heltzel, conferred by telephone today with Ms. Betsy Ullrich of the NRC Region I office regarding the possibility of an extension. Ms. Ullrich gave Mr. Heltzel the impression that an extension was not likely but recommended that I contact you in this matter.

I would be happy to discuss this request with you at your convenience should you require more information.

Thank you very much for your consideration in this matter.

Sincerely,

A handwritten signature in black ink, appearing to read 'John M. Tabb, Jr.', written over a horizontal line.
