UNITED NUCLEAR-MALLINCKRODT -- DOCKET 70-36 -- RENEWAL OF LICENSE

Ref: DLAR:CDL

At the time United Nuclear's request for renewal came in I discussed with Dick Kirk procedures to be followed in connection with review and bringing the license up-to-date. At that time, he felt that the time to do this would be after the first publication of the new Parts 70 and 71 in the Federal Register.

The last time I talked with Dick, he indicated that this may not be the way to do it, but that instead a comprehensive review should be made at the time of renewal, whether or not Parts 70 and 71 are in print.

Perhaps you and I could get together with Dick and decide on a modus operandi. Both United Nuclear and General Electric have recently come in for renewal, and then there is the long standing case of MEC Nuclear which I hope we can reconcile at the earliest possible date.
