UNITED NUCLEAR CORP. TWE REQUESTING APPROVAL FOR SHIPMENT
URANIUM METAL

We have reviewed the United Nuclear teletype dated April 13,
requesting approval of a single shipment of 4.5 kg uranium
metal, 10% enriched containing 450 grams U-235.

Although the shipping container is not adapted for bulk ship-
ments of special nuclear material, we see no objection to a
one time only shipment of this small quantity of uranium.
