

Docket 70-36  
Project S-8  
June 21, 1963

Donald A. Russbauer, Chief  
Source & Special Nuclear Materials Branch, DLR

Charles D. Luke, Chief  
Criticality Evaluation Branch, DLR

UNITED NUCLEAR, DOCKET 70-36

In our memoranda dated May 18, 1960, and November 23, 1960, we called to the attention of your Branch the unsafe practices employed by United Nuclear in improperly using the graph of Figure 15, from a Los Alamos report, LAMS 2415. We have been checking through the docket and can find no record that this warning was ever transmitted to United Nuclear.

In a recent application dated June 17, 1963, United Nuclear again improperly used this curve as a basis for a nuclear safety determination. I am asking Dick Odegaarden to work with Bob Layfield in making clear to United Nuclear the limitations which must be observed in using this criterion.
