

Docket 70-36
Project S-8

Donald A. Nussbaumer, Chief
Source & Special Nuclear Materials Branch, DLR

January 28, 1964

Charles D. Luke, Chief
Criticality Evaluation Branch, DLR

UNITED NUCLEAR CORPORATION, CHEMICALS DIVISION - MANUFACTURE
6.5 KG URANIUM BISCUITS - DOCKET NO. 70-36, DECEMBER 4, 1963

SYMBOL: DLR:RHO

United Nuclear Corporation has requested a license amendment to their renewal application, July 15, 1963, to increase the maximum weight of the uranium metal biscuits from 3.0 kg to 6.5 kg uranium. This was discussed by telephone with Mr. L. J. Swallow on January 27, 1964.

We pointed out to Swallow that pertaining to the manufacture and storage of these biscuits, we had raised three questions (numbered 10, 15 and 16) in D. A. Nussbaumer's letter to UNC dated December 13, 1963. He promised to send a TWX answering these questions. Also, he would temporarily withdraw his request for changes in shipping procedures until resolution of the shipping problems we have with UNC renewal applications at both Hematite and New Haven.

Mr. Swallow requested information on shipping container designs and we referred him to TID-7651 and LAMS-2983. We also suggested that he examine dockets in the Public Document Room.
