Criticality Branch, ML

UNITED NUCLEAR CORPORATION, CHARLESTOWN, RHODE ISLAND, - ALTERNATE
SHIPPING CONTAINER - DOCKET NO. 70-820 - TELEGRAMS DATED JUNE 25 & 30,
AND JULY 1, 1964

SYMBOL: ML:RHO

United Nuclear Corporation has requested license amendment to ship water insoluble uranium compounds up to fully enriched uranium containing a maximum bulk density of 3.2 g U/cc. The container is basically a 5" Schedule 40 pipe in a 55-gallon drum as described in the subject telegrams. The maximum number of containers per shipment will be 20.

We recommend approval of this license amendment request. The container was previously determined not to exceed the 10% deformation, in connection with the review of UNC's New Haven license.
