U.S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Washington, DC 20555-0001

Dear Sirs:

**Subject: Palo Verde Nuclear Generating Station (PVNGS)  
Unit 3  
Docket No. STN 50-530  
Action from ISI Relief Request 33**

As part of the Relief Request 33, Arizona Public Service made a commitment to assess any long term impacts of the Unit 3 Pressurizer heater overheating condition on previously approved Palo Verde Nuclear Generating Station ISI Relief Requests 23 and 29. This assessment has been completed and it has been confirmed that the overheating condition, documented in Relief Request 33, did not result in any changes to the conclusions reached in Relief Requests 23 and 29.

No commitments are being made to the NRC in this letter.

If you have any questions on this issue, please contact Thomas N. Weber at (623) 393-5764.

Sincerely,

CDM/TNW/RJR/ca
