Subject: Re: Assertions relative to some unnamed East Coast plant.

Thanks, we'll take a look at it. It doesn't sound too similar to issues raised at our plant, however,

Ex. 7C

Anne: We came across the following relative to a followup we were doing on a recent newspaper article that referenced some guards that conveyed criticism of nuclear plant security to certain members of congress. We have high confidence that the assertions in the attached web page pertain to Salem/Hope Creek, however I committed to our allegation panel that I would inform you of the information since the material refers to an unnamed East Coast plant. Do with this as you see fit. Call if you have questions.
