SUBJECT: PETITION FOR RULEMAKING 50-80

Dear Mr. Lochbaum:

I am writing to provide you an update on the status of a petition for rulemaking, Docket No. PRM-50-80, that you submitted on April 28, 2003, concerning radiological sabotage of nuclear power plants. In our previous status letter to you, we informed you that a Petition Review Board (PRB) was convened on November 25, 2003 and a recommendation to the Commission was in preparation. Subsequent to that letter, a followup PRB was convened on October 28, 2004 that modified the previous recommendation. The resulting recommendation regarding disposition of petition PRM-50-80 was provided to the Commission after interoffice concurrence was obtained.

As you are aware, actions of the PRB are considered pre-decisional and cannot be released until the Commission issues direction for disposition of the petition. A letter will be sent to you regarding disposition of your petition when the Commission provides direction to the staff and releases that information.

I regret that a significant amount of time has elapsed since our last status letter to you and apologize for the oversight.

If you have any questions or comments, please contact me at 301-415-2829.

Sincerely,

*/RA/*
